

Enterprise Standards and Best Practices for IT Infrastructure

Lab 04

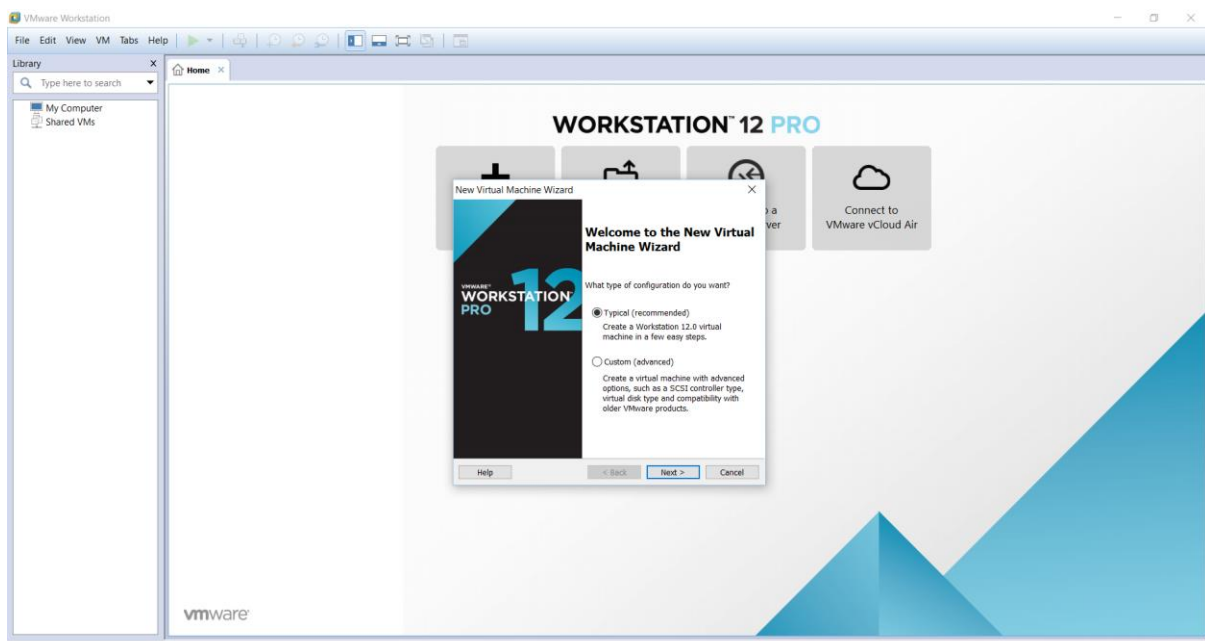

Installation of ESXi 5 (VMware Hypervisor Installation)

Install VMware Workstation to get started with installing ESXi 5.

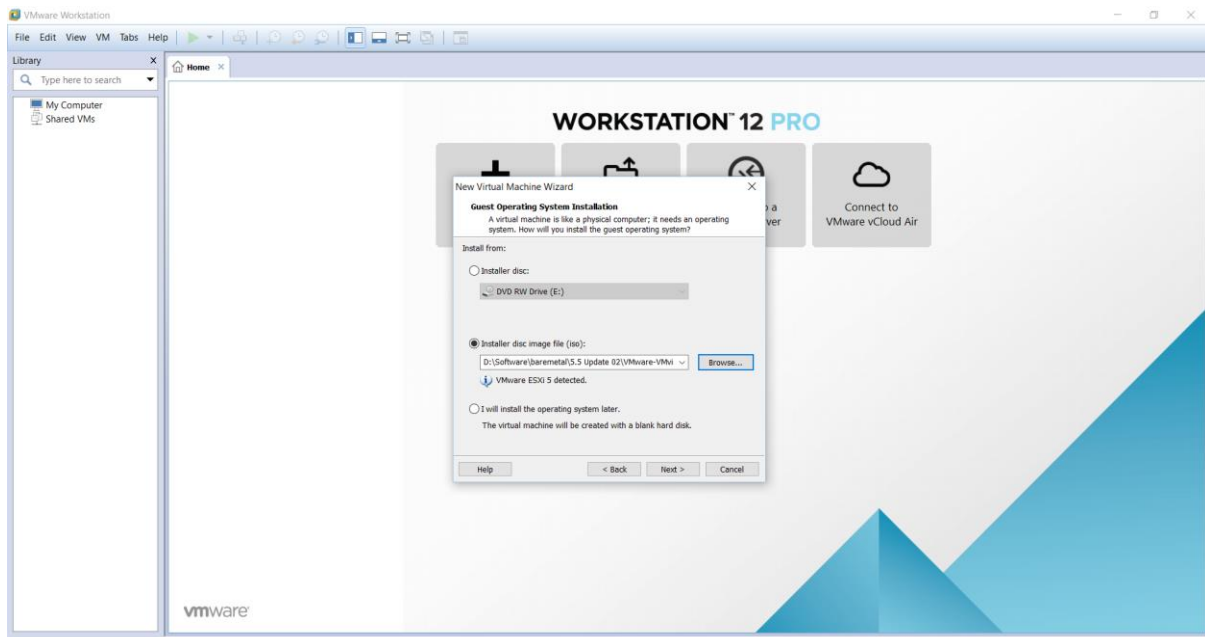

Select 'Create a New Virtual Machine' from 'Home' tab.

Choose 'Typical' and click 'Next'.

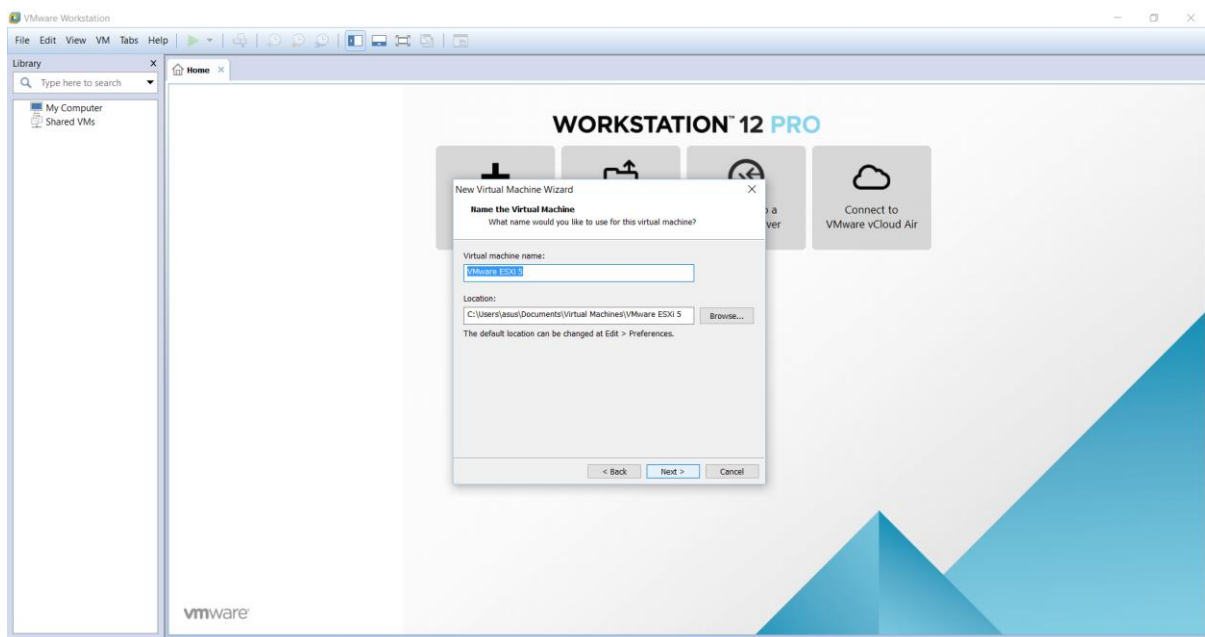

Select 'Installer disk image file (iso)' from next window.
Browse for the ESXi 5 iso and click 'Next'.

Provide a name for the virtual machine.

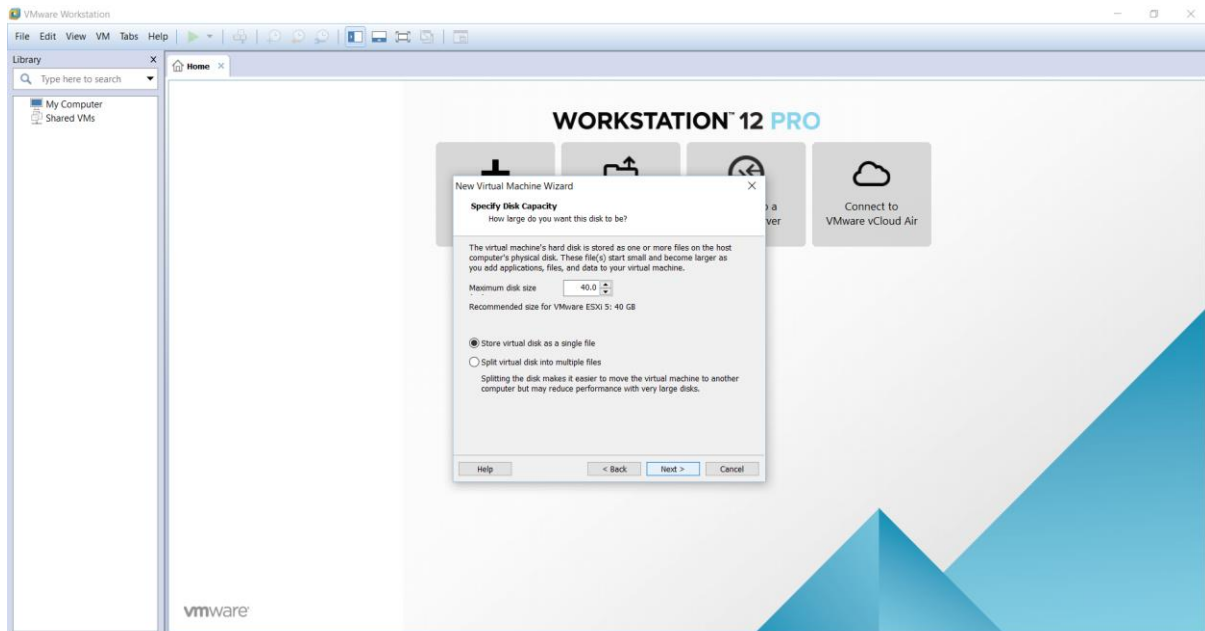

Browse for a location to save and click 'Next'.

Specify the disk capacity.

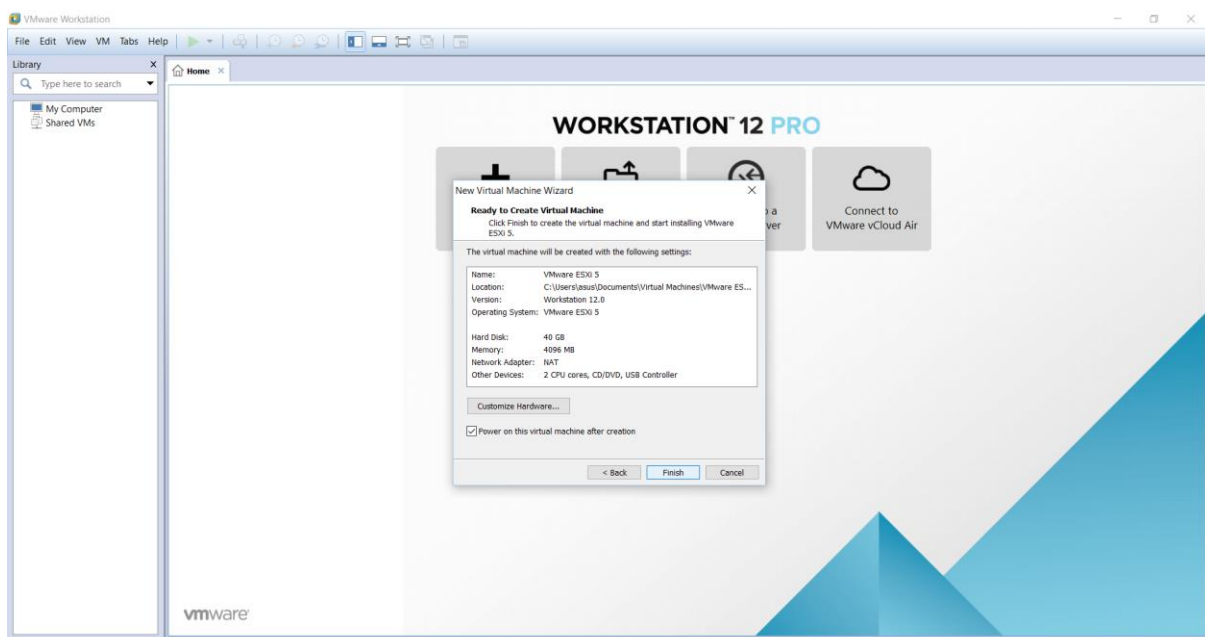

Keep the recommended size for VMware ESXi 5 as it is. (40 GB)

Choose 'Store virtual disk as a single file' and click 'Next'.

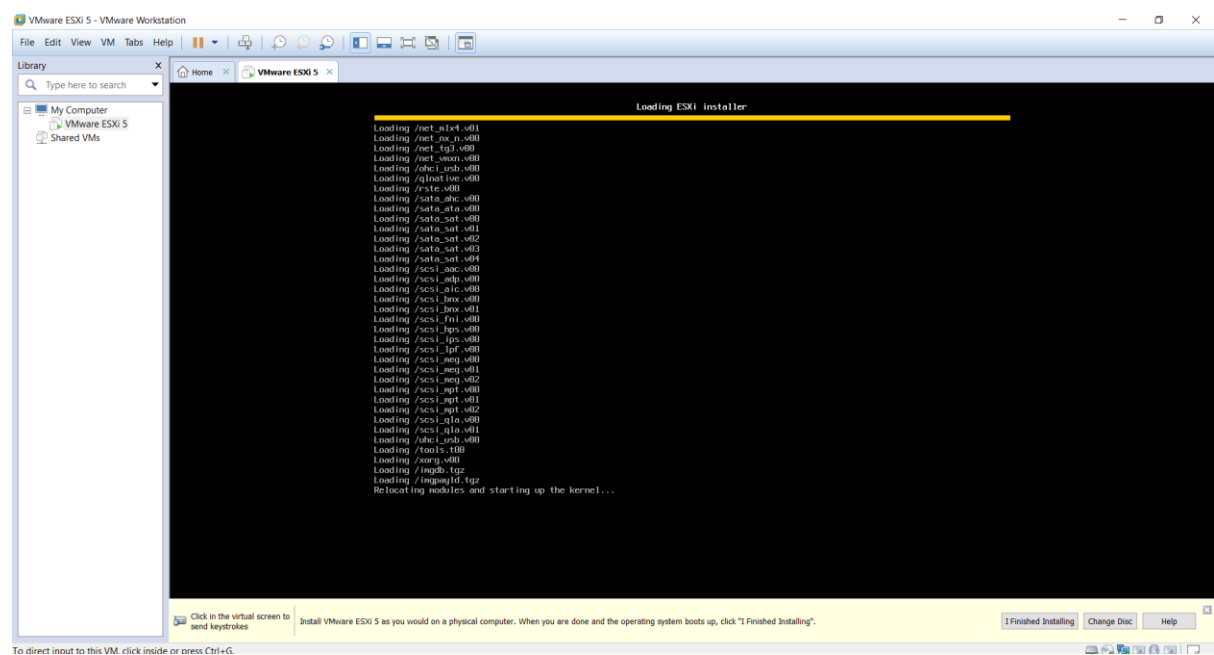

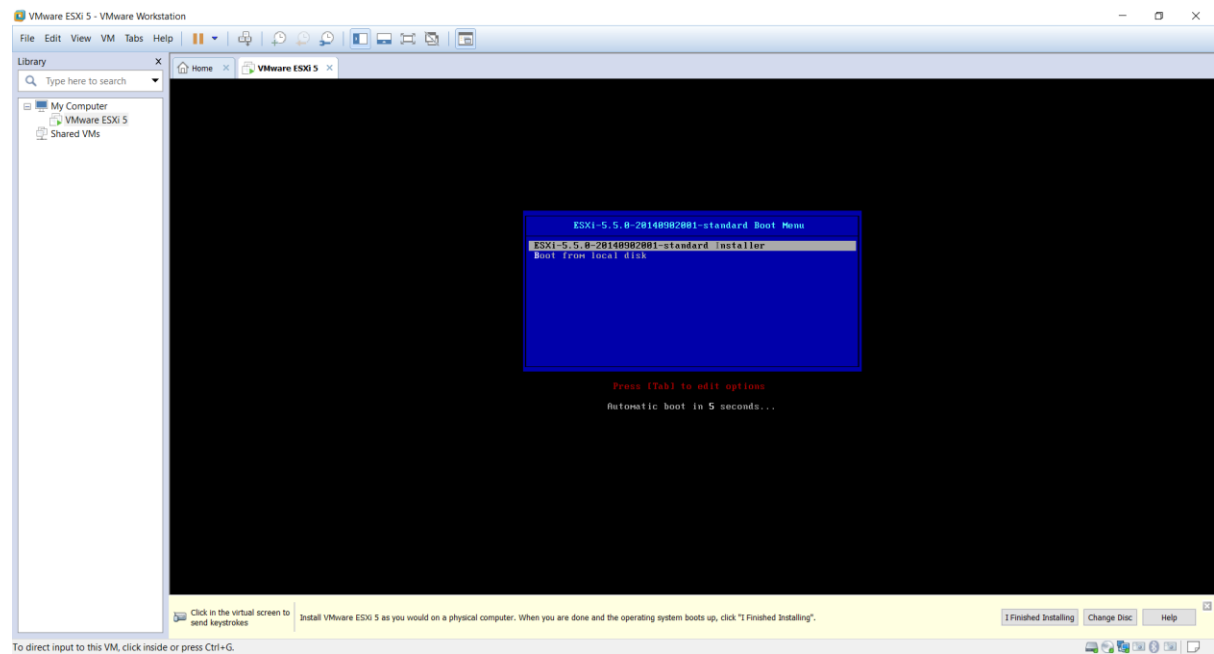

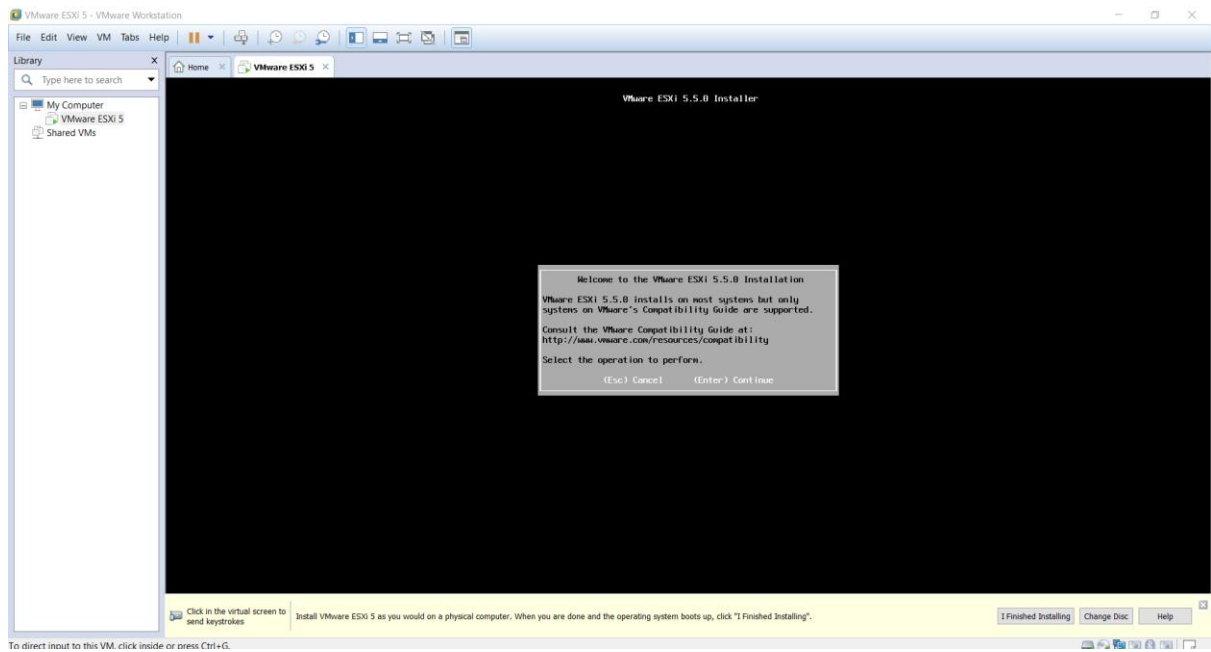

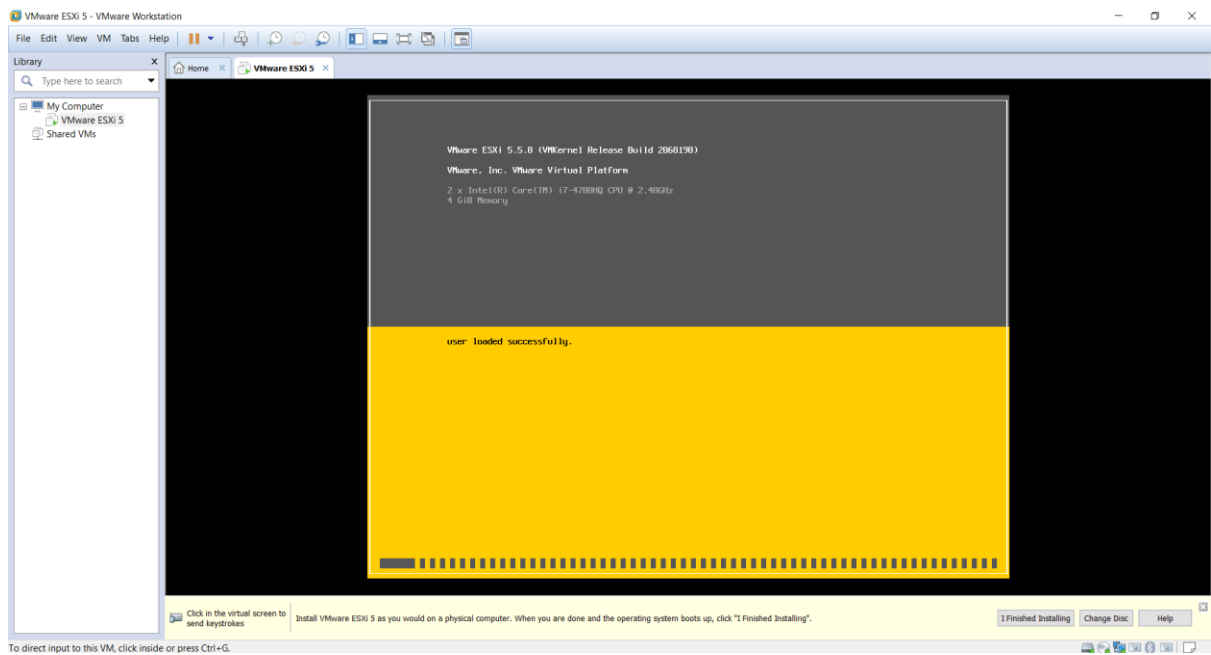

Select 'Power on this virtual machine after creation'.

Check the settings and click 'Finish'.

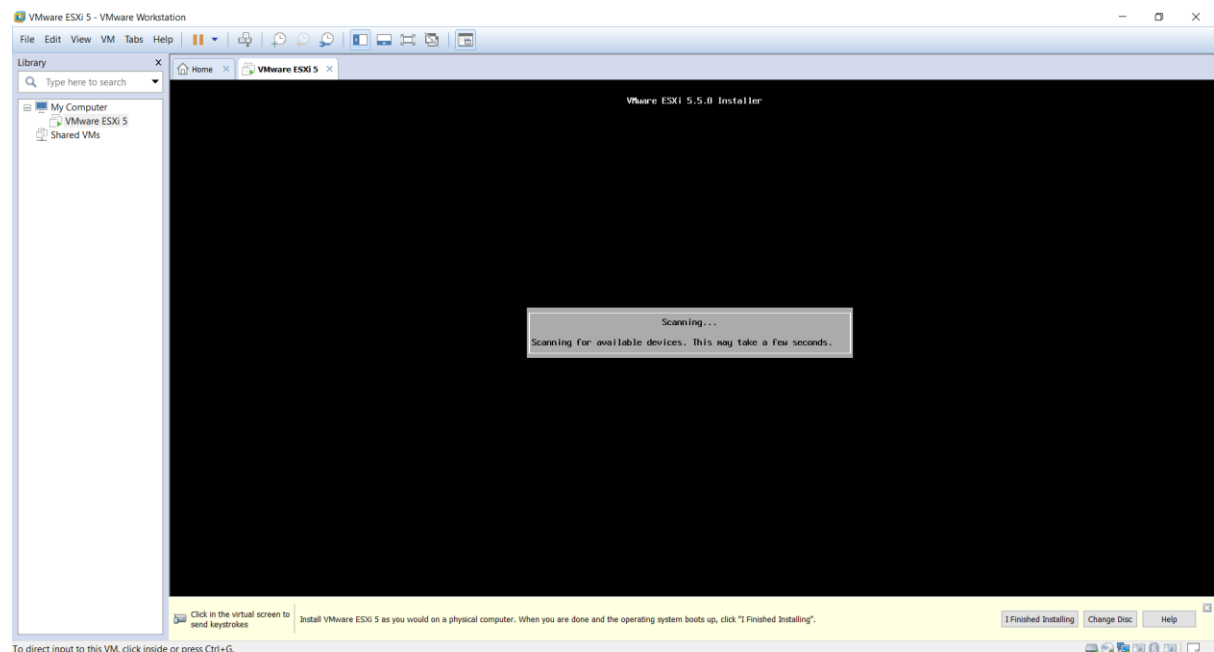

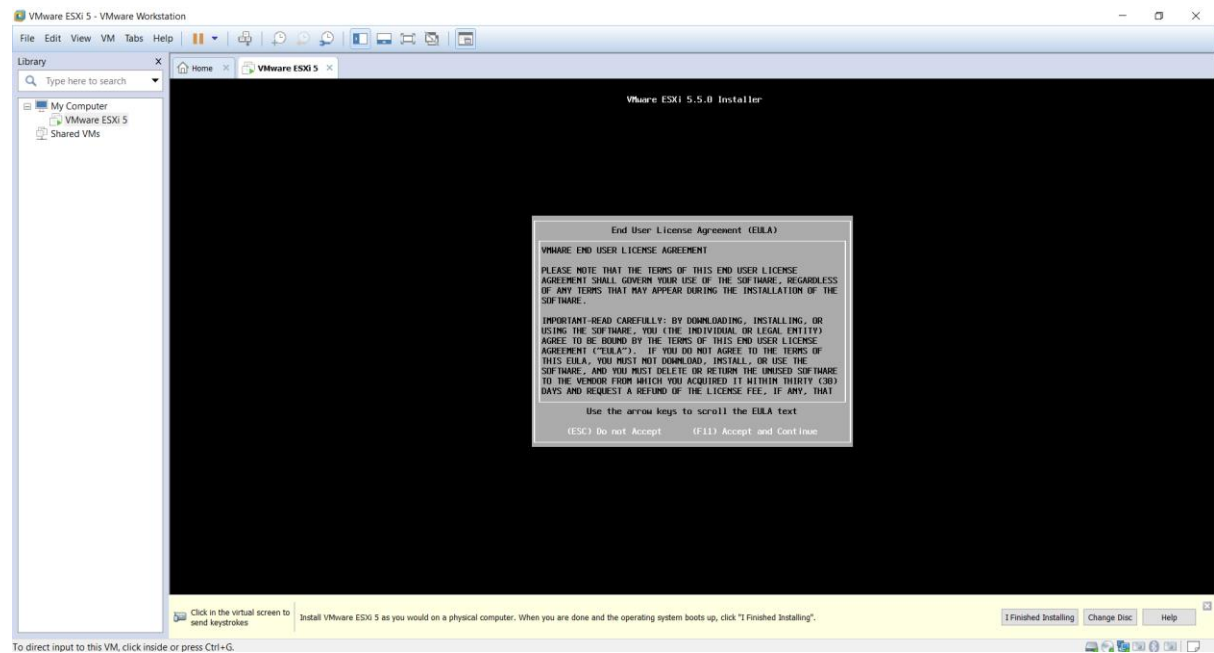

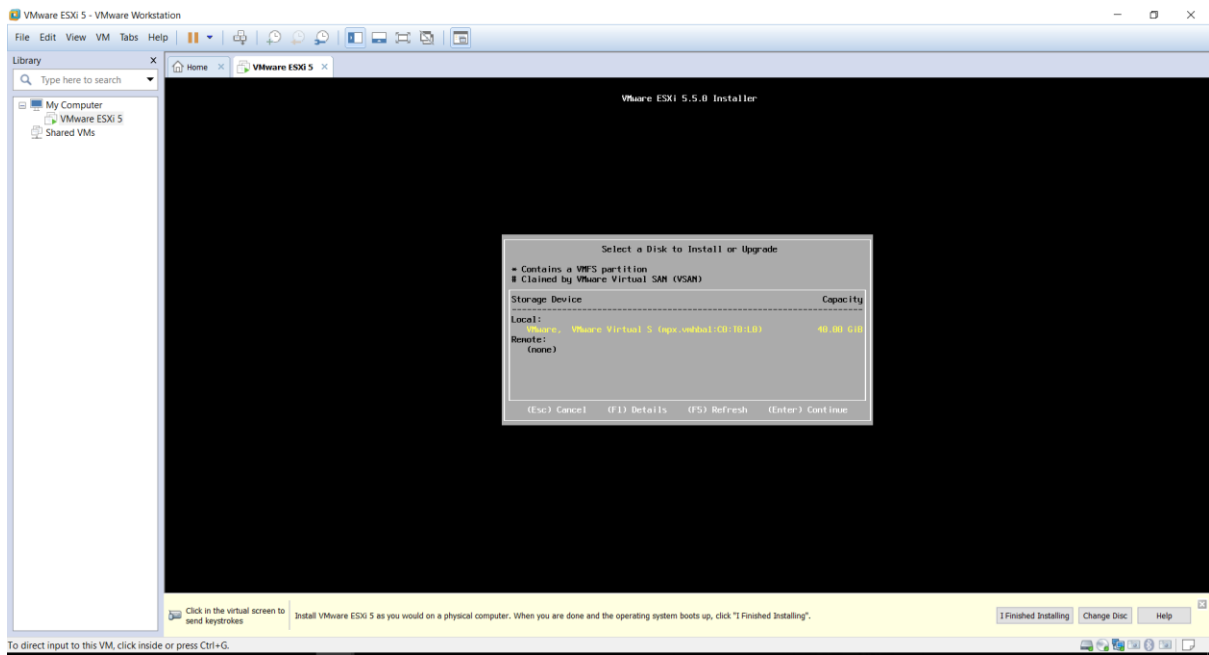

Then the installation will continue.

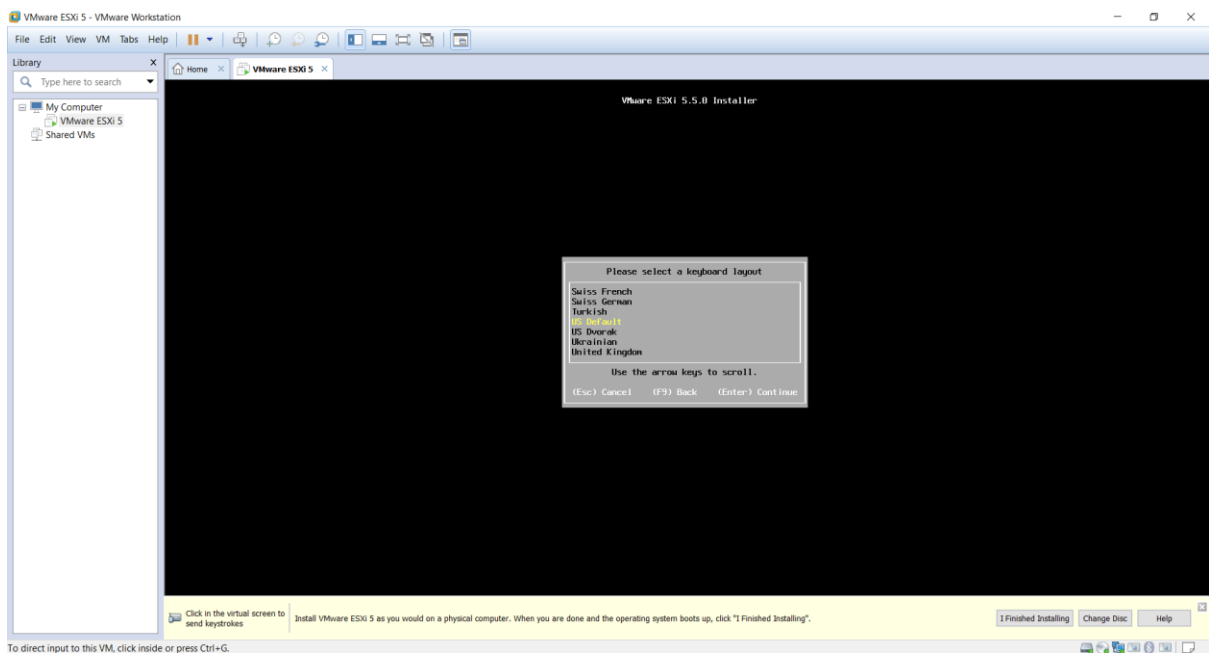

Press 'F11' to accept VMware End User License Agreement and continue.

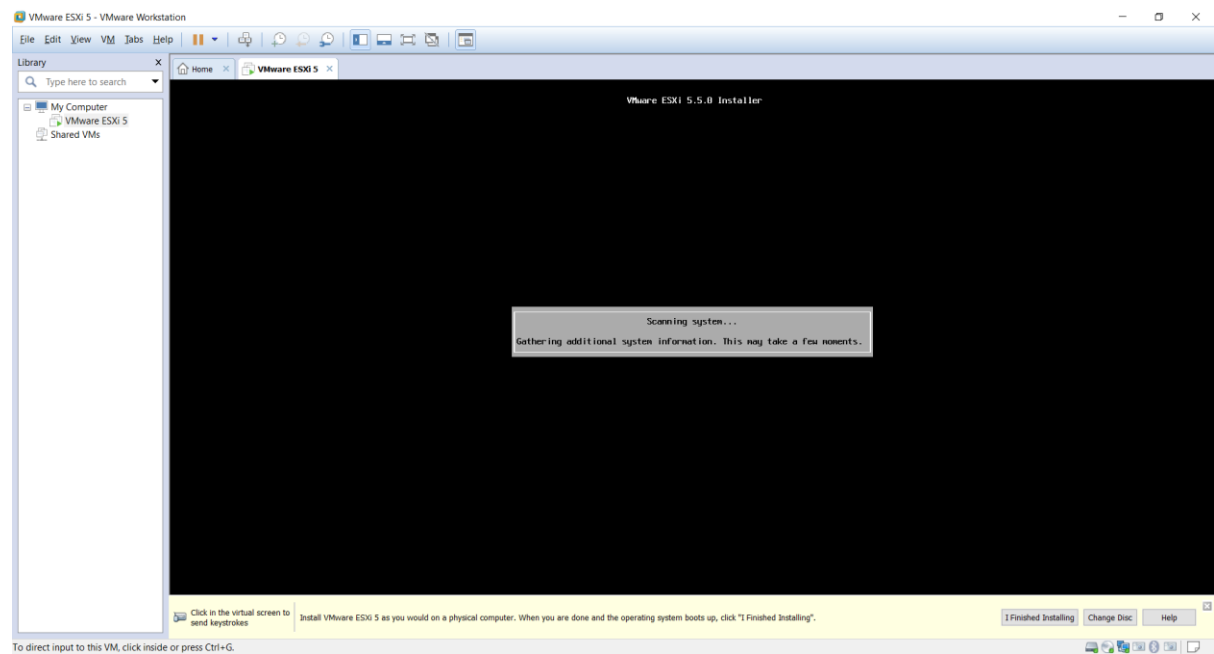

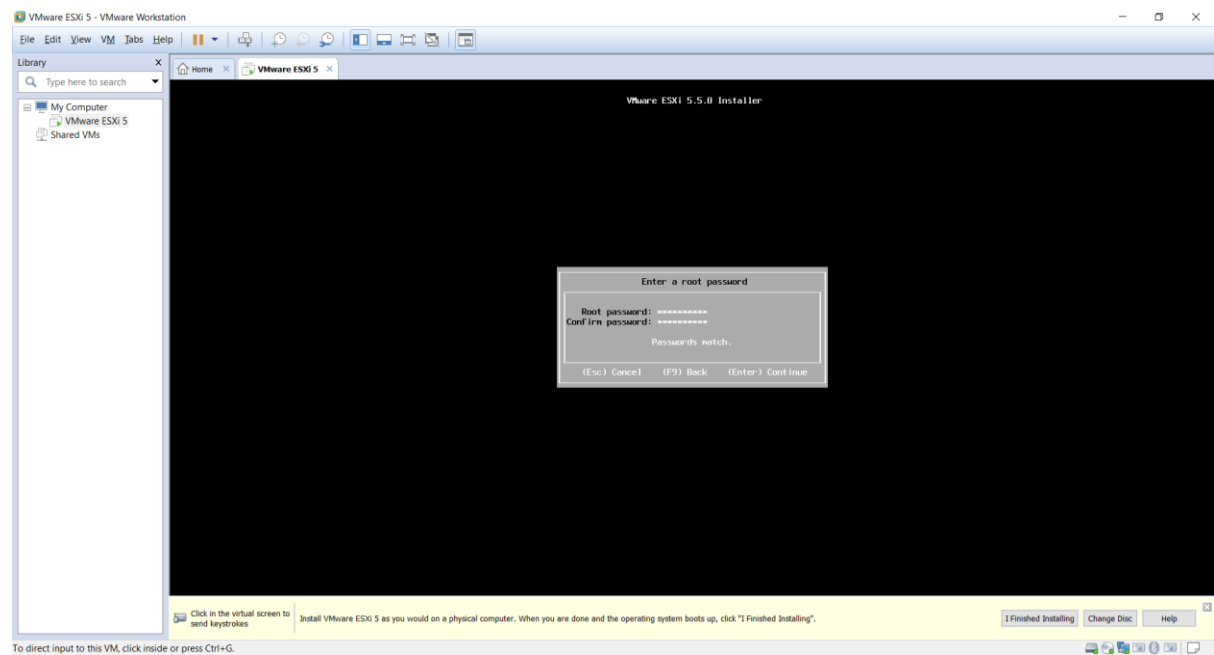

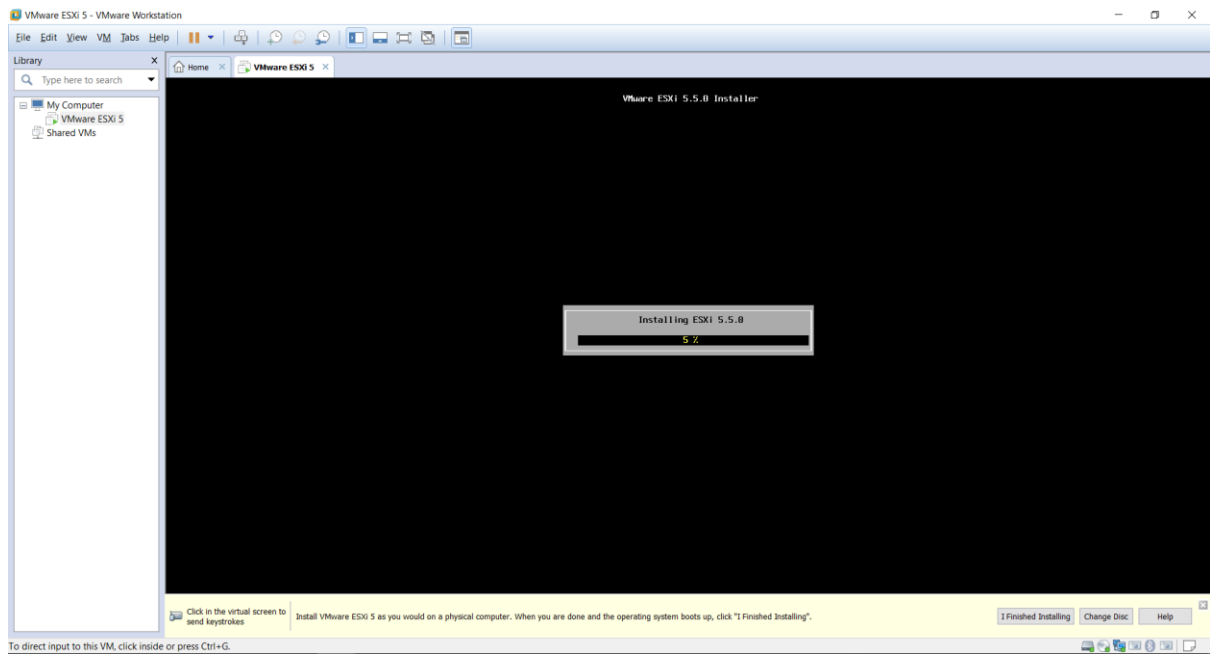

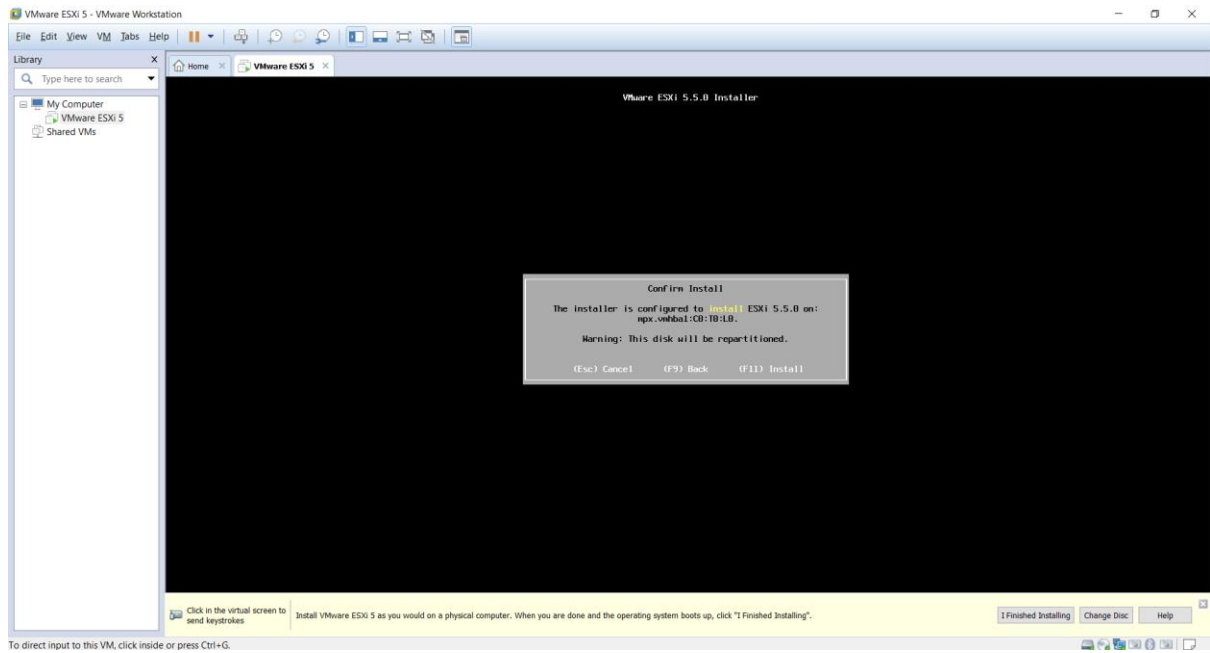

Select the keyboard layout and press 'Enter' to continue.

Provide a root password and press 'Enter' to continue.

Press 'F11' to confirm install.

Press 'Enter' to reboot from 'Installation Complete' window.
